

TConnect

Simplify and secure your machine-to-machine connectivity

Cloud-based software that provides a simple and secure remote connection between your TBox Remote Telemetry Unit and your PC.

M2M device connection solution

Provides a simple & secure solution to remotely access, configure, monitor and control your RTUs

Allows you to access RTUs connected to GSM/Cellular network

Removes the need for your non-technical users to manage a network or a VPN access

Simplifies the management of your RTU network

Saves you time installing new RTUs or configuring OpenVPN access

Saves you money by eradicating the need for a paid dynamic DNS Service

Access outstations located in private networks from anywhere

 **servelec technologies**

Integrated SCADA, Telemetry and Business Optimisation

- SCADA Design & Systems Integration
- Remote Telemetry & Control Technologies
- Optimisation & Decision Modeling Tools

SECURITY:

- Security between TConnect and your Remote Telemetry Unit: OpenVPN includes authentication and encryption (based on SSL/TLS standards)
- Security between TConnect and your client PCs: TConnect communication is issued on "https" standards
- TConnect access rights are password protected

CONNECTION / USER FRIENDLINESS:

- Address Book functionality to easily connect any TBox to configuration software (TWinsoft) or web browsers
- Compatible with any OpenVPN Server:
 - Import of OpenVPN configuration files
 - Automatic configuration with Lucom OpenVPN server
- Automatic registration of new RTUs (requires a public IP address)
- "Upload OpenVPN configuration files" feature
- Access to TBox on cellular networks with dynamic private IP addresses
- Automatic reconnection when dynamic IP address is changed by the GSM/Cellular network
- Removes the need for a paid subscription to a dynamic DNS Service (DynDNS, NoIP, etc)

ADMINISTRATION

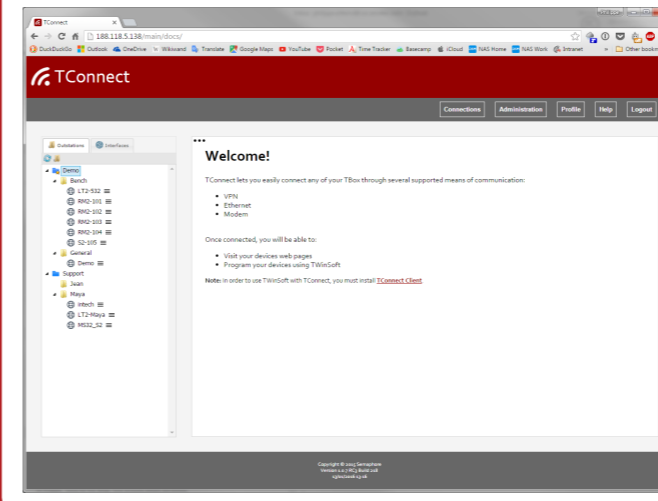

- Multi user management features as standard
- Remote Telemetry Unit groups assignment feature

TRIAL OFFER

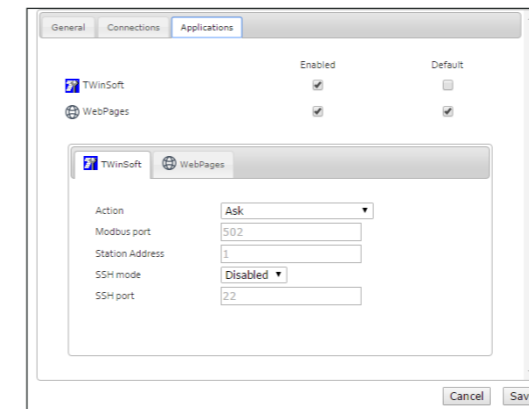

Why not take advantage of our online demo? You can use TConnect in a safe environment for a two week period without obligation. There are also tutorial videos available to demonstrate just how simple the TConnect solution is.

Contact sales@servelec-technologies.com for your free trial!

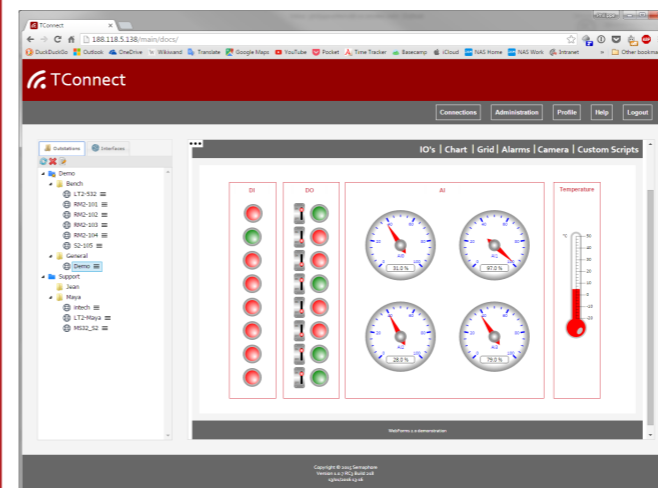

Use TConnect from any modern web browser on a PC, MAC, Linux or Mobile Device such as an iPad or iPhone.

With TConnect you can configure any outstation that you are connected to.

With TConnect you can view the current status of any Remote Telemetry Unit in your network at a glance via an interactive dashboard.
